❖ Image

❖ Overview

- VF Manager is software helping you to store, look up and manage all information relating to fleet & transportation, constructions… quickly, conveniently and effectively.

- VF Manager is designed not only to be used for technical management in large transportation companies *(with thousands of vehicles)* but also appropriate for taxi companies, fleets of companies, workshops, parking service…

- VF Manager is updated and upgraded for free like other application software.

- VF Manager currently has 02 versions:

+ *(Single Computer)* using the single computer

+ *(Network Computer)* using multiple computers linked via LAN

- VF Manager uses 03 languages: Vietnamese, English, and French

- Low price

- VF Manager – Best choice for everybody

❖ Why should I use this software?

Because VF Manager can help you to manage your fleet perfectly:

- Take a weight off your mind by using the service schedule and automatic reminders.

- Save time - automatically make information tables, bills, repairs, license plates, insurance data, serial number, driving license and other vehicle information.

- Making statistics of operating costs of fleets, workshops... is very simple, just a click. Moreover, it is very flexibility to modify, to report or to print...

- Convert files into MS Excel files

- Create groups of vehicles to provide you with an easy breakdown of your fleet

- Monitor & graph the petrol consumption of each and every one of the vehicles in your fleet daily, monthly, yearly. When you buy fuel, keep your receipts and enter the data into VF Manager. The fuel consumption level will be calculated and you can get the long-term trend through graphs and can find engine problems before the warranty deadline.

- Secure your vehicle fleet data with the multi-level security system.

- Benefits from information accession - faster and more convenient than other statistical machines

- You can get a 30 day free trial

❖ **Installation caution**

When you install the software for your computer, your computer must be connected to Internet or MS.net Framework 1.1 has been installed.
