

❖ Image**❖ Function**

- Emulate the design, operating principle of instrument panel
- Provide electrical diagram of indicator system, analog, digital, ON/OFF, flashing
- Investigate the process, operating modes on instrument panel
- Observe, measure, make pan by common used electrical instruments
- Investigate the relationship with other systems in car

❖ Purpose

- Trainees can understand the basic components, operating principle, electrical diagram, the position of component in practical of instrument panel
- Trainees can get the way to diagnose and repair
- Equivalent comparison and application of different automobile firm

❖ Components

- 01 Instrument panel and frame to lay it on
- 01 Relay
- 01 Fuse
- 01 Emergency stop switch
- 01 Ignition key
- Electrical diagram and emulated electronic unit
- Movable board
- Switches and buttons
- Guide book

❖ Other specifications

- Power: 220 V
- Humidity < 80%

❖ Overview

- IP TRAINER is product of DTDAuto Technology Team, Institute of Physics, Hanoi, Vietnam.
- Equipment is designed specially for vocational schools where trainees are taught both theory and practice of the instrument panel system.
- It is also the modern training equipment providing all basic elements in technique training such as listening, watching, Acting by emulating the real system.
- IP trainer concludes gauge, switch, and electronic control unit produces signal as in real system. All of them make the equipment various, multifarious
- Equipment is laid on a movable table power source is 220V/AC, no battery requirement
